

Breast Tip

Code:

Breast L004

1. Position of breast tip.

2. Insert the point of the knife between the 6th and 7th ribs and complete the cut as though removing a forequarter.

3. Make a cut from the first point, parallel to the backline of the carcass.

4. Remove the breast tip by cutting along the same line to remove the square cut breast.

5. Breast tip cut to specification.
