

Fore rib – bone-in, partly chined

Code:

Fore rib B004

1. The fore rib should be removed from the carcass between rib bones 6-7 and 10-11 (counting from the neck upwards).

2. The length of the tail is not to exceed 60mm from the outer tip of the eye muscle. The backbone is partly removed as illustrated.

3. Cut and saw between the ribs to produce joints.
