integrated soft fruit
production***

Project Number: SF 104

Title: Biopesticide product gap analysis and evaluation to support development policy for biopesticides for use in integrated soft fruit production

Start and end dates: 1 January 2009 to 31 May 2009

Project Leader: Dr Roma Gwynn, Biopesticide Rationale Strategists

Project Co-ordinator: Mrs Harriet Duncalfe, H & H Duncalfe

Location: Rationale Biopesticide Strategists, Berwickshire

Background and project objectives

This project aims to provide UK soft fruit growers with detailed information about biopesticides that can be used as part of robust integrated crop protection protocols that support soft fruit production systems. This information would be used to develop policies on biopesticides and strategies to streamline the availability of the products needed by growers.

To achieve these aims there will be liaison with key marketing groups and supermarkets. In addition, it will be important to link with UK and European regulators, and biopesticide companies to ascertain product availability and ways to encourage increased product availability in the UK.
