

Storage before use

- Product quality – nematodes are living organisms
 - Quality control checks pre distribution (including nematodes infectivity)
 - Nematodes to be refrigerated at 5oC (**on label**)
 - Relatively short shelf life (best before date weeks rather than months)

The Chemical Company

Application guidelines

- Avoid applications in bright sunlight, apply during evenings and dull conditions
- Observe use by dates on pack
- Mix pack with cool water.
- Use entire pack at one time and do not store once made up into solution.
- During applications constantly agitate solution.
