Energy efficiency case studies for
field vegetables enterprises – a
review of current practices

Project Number: FV 383

Title: Energy efficiency case studies for field vegetables enterprises – a review of current practices

Start and end dates: 1st July 2010 – 31st December 2010

Project Leader: Chris Plackett

Project Co-ordinator: John Sedgwick and Cheryl Brewster

Location: Farm Energy (FEC Services Ltd)
The Energy Centre
Stoneleigh Park
Kenilworth
CV8 2LS

Background and project objectives:

Energy surveys will be carried out on six representative businesses covering the major outputs from the UK field vegetables sector. These surveys will determine the current levels of energy efficiency for each site and identify the scope for making energy saving and CO₂ emissions reduction improvements in the future.

This project will provide a first step to implementing improved energy saving practices across the UK field vegetables sector by providing simple energy saving information that growers can implement in their business. Areas for further work will be highlighted and recommendations will be made regarding the potential for energy savings across the sector.
